

HallmarkSurgicalTM
When you care.

**PROVING
INDISPENSABLE
TO THOSE WHO CARE**

Our Story

When you care.

The Healthcare Profession, as caring for life, is arguably the most responsible and most respected professions known to man. Life is precious and perilous. To fall short when a life, (or lives), are at stake is unthinkable - on both your part and ours.

Hallmark Surgical - the name stands for excellence - has deliberately set the bar high. The instruments and devices we provide are devoted to preserving that life. But, more than that, Hallmark Surgical upholds the skill and experience of people by providing you with trusted knowledge and support, at all levels of health care.

Because, like you, every day we both protect and serve.

What's in it for you?

BiopSafe

Innovative Prefilled Histology Containers

The secret is in the lid

With BiopSafe, there are no difficult formalin bags and wall holders that often leads to formalin waste. The system consists of a small, easy to use container (vial) with formalin capsuled in the lid. When the biopsy is placed at the bottom of the container, you screw the lid on and gently apply pressure with your thumb, allowing the formalin to flow out and cover the biopsy. Everything is done inside the container ensuring the clinician is protected from both the liquid and vapour of formalin.

Hermatically Sealed System

As well as causing irritation to mucous membranes and allergy, formalin is a carcinogenic substance. Therefore it is very important to secure a safe working environment when handling formalin. With BiopSafe, the handling is done in a hermatically sealed system providing the best protection for staff. The staff are never exposed to formalin, not even during the process of screwing the lid on or off.

The new road to safer biopsy handling

One of the most common problems in connection with biopsy handling is the risk of being exposed to formalin, either through touch or inhalation, a risk doctors, laboratory technicians and nurses are exposed to every day. With BiopSafe, the problem is finally solved.

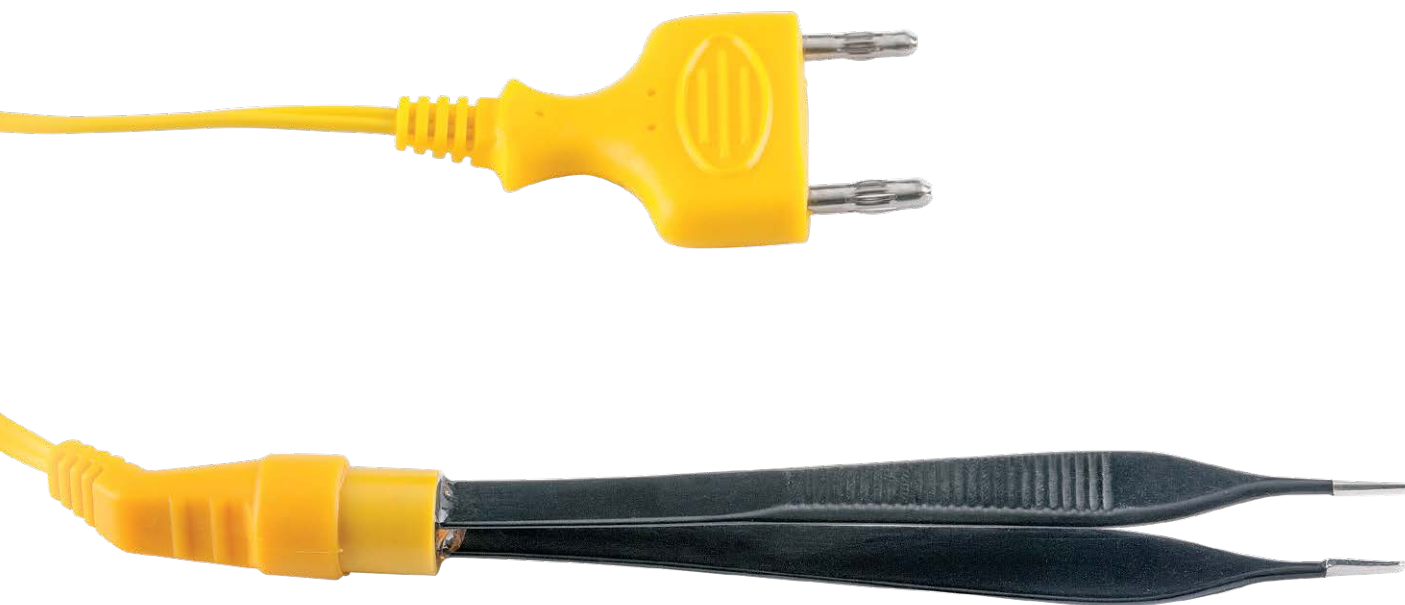

Ready in seconds

Besides from being safe, the method is also fast. BiopSafe is always at hand and the process of placing the biopsy, adding formalin and making it ready for transportation to the laboratory is done in a matter of seconds. BiopSafe saves valuable time!

Introducing the SOLO™

Single Use Laparoscopic Electrode Range!

Extensive Tip Designs

L-Hook, J-Hook, Spatula, Ball, Needle, Cone, Knife and integrated suction designs available to allow your entire requirement to be transferred to Single Use

Versatile

A variety of universal cable connections, that can be used with you current cables, or through separate ports to current laparoscopic instruments you are using

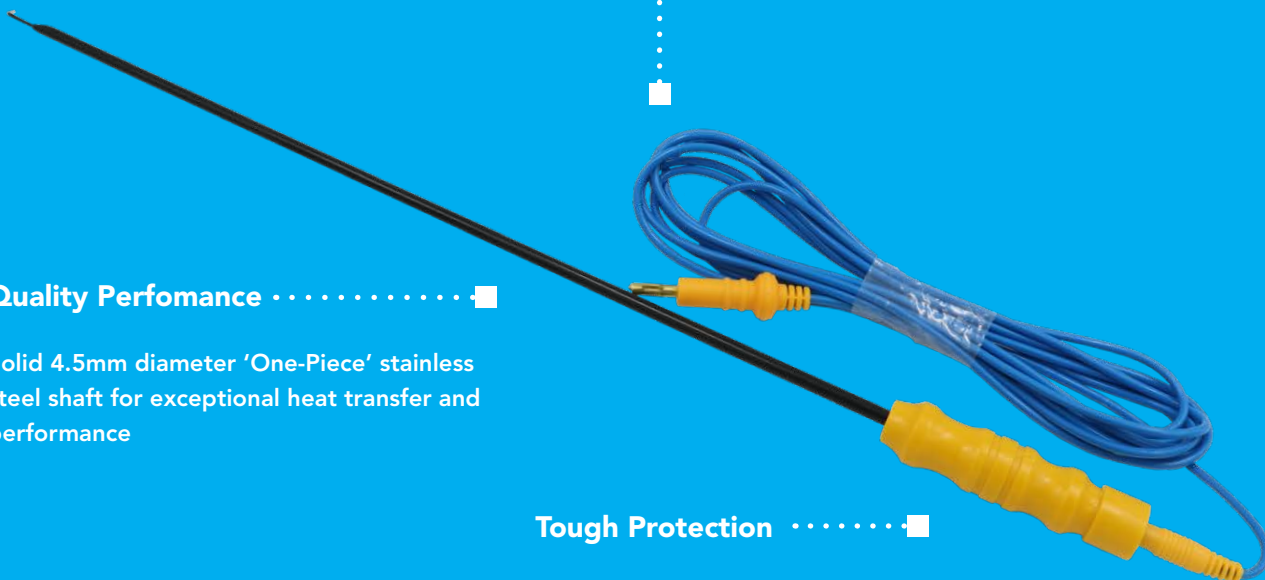

Quality Performance

Solid 4.5mm diameter 'One-Piece' stainless steel shaft for exceptional heat transfer and performance

Tough Protection

Hard wearing 0.25mm baked epoxy insulation providing prevention of scratches from trocars and assured protection throughout the surgical field.

Disposable Laparoscopic Electrodes

SOLO™ Laparoscopic Electrodes, for pristine tip condition with consistent outcomes

SOLO™ L-HOOK LAPAROSCOPIC ELECTRODE

- Moulded handle with contours for positive and comfortable grip
- High quality baked epoxy insulated shaft
- Solid one-piece stainless steel shaft for exceptional heat transfer and performance
- Latex free, sterile packed

ALSA Diathermy Generators

Multi-functional Diathermy Generators for minor surgical procedures.

ALSA 80W ELECTROSURGICAL GENERATOR

- 80 watt output
- Footswitch activation
- 9 monopolar functions; Bipolar function
- Digital control panel
- Touchpad switches for easy cleaning
- Supplied with Monopolar Kit ESB700/A
- Made in Italy

Order Code	Product
ESU50MPC	Multi Function 80W

ALSA MONOPOLAR ACCESSORY KIT

- 1 x footswitch pencil with 3m cable
- 1 x patient return plate with 3m cable
- 1 x silicone patient strap
- 6 x electrodes including blades, needles and balls
- All items are reusable and autoclaveable.

Order Code	Product
ESB700/A	Suits Generator ESU50-MPC

ALSA 140W ELECTROSURGICAL GENERATOR

- 140 watt output
- Handswitch and Footswitch activation
- 9 monopolar functions
- Bipolar function
- Digital control panel
- Touchpad switches for easy cleaning
- Supplied with Monopolar Kit ESB730/A
- Made in Italy

Surgical Suction

SURGICAL SUCTION

Suction Liners	50-51
Frazier Suctions	52-53
Fukushima Teardrop Suctions	54-55
Specialty Suctions	56-60

SOLO™ Suction Liner System

World Class innovative suction management system for every level of healthcare including OR, Endoscopy, ICU, Outpatients, Clinics and Wards

Fluid activated shut-off valve
for safety during procedures

Integrated suction connection on
the liners providing lowest set-up
time among all suction liners

Robust, strong canister's available
in 1L, 1.5L, 2L and 3L sizes, with
measurements readable from 270°.

Highly flexible, durable and
compact suction liners reducing
storage space and environmental
waste

'Series' installation enables
automatic switch over to multiple
suction canisters for high fluid
applications

Available to be installed in Series,
Rail Mounted, Wall mounted or
trolley mounted for your perfect
set-up

Suction Liners

Compact, fast and durable suction liner system

SUCTION CANISTERS

- Durable, long-lasting reusable canister
- Wide measuring scale visible from 270 degrees for easy reading
- Built-in brackets on canister provides easy mounting options
- Available in 4 sizes
- Large range of connection options available for your ideal suction system setup
- Reusable UOM: Each, 12 or 25/Carton

Order Code	Product

New Zealand's Premium Frazier Suction

Available with polished, atraumatic or fenestrated tips depending on your surgical need

Rigid stainless steel lumen which doubles as a probe during surgery

Precise control through the ergonomically shaped handle and suction port

Non-blocking handle design - The aperture of the channel through the handle is significantly larger than the cannula, ensuring no blockages occur

Manufactured in the UK

HallmarkSurgical™
When you care.

Surgical Suction Cannula

Eliminate risk with single use Suctions but with no compromise in quality, control and performance of Suction.

FRAZIER SUCTION - POLISHED TIP

- Premium quality suction with strong Stainless Steel lumen which also acts as a probe.
- Surgical grade ABS moulded handle, non-blocking design
- Precise suction control port
- Handle ergonomically shaped for firm grip and control
- Made in UK
- Single use, latex free, sterile easipeel packed
- UOM: Each, 25/Dispenser Box

Order Code	Product

Eliminate risk with single use Suctions but with no compromise in quality, control and performance of Suction.

LASER SUCTION

- Laser suctions combine two instruments in one
- A 0.9mm fibre optic laser port bonded to the suction tube allows simultaneous aspiration with cutting and coagulation
- For use with 600 micron core laser fibre with 850 micron sheath
- Premium quality suction with strong Stainless Steel lumen
- Surgical grade ABS moulded handle, non-blocking design
- Precise suction control port
- Handle ergonomically shaped for firm grip and control
- Made in UK
- Single use, latex free, sterile easipeel packed
- UOM: 25/Dispenser Box

Order Code	Product
H34100609GW	6fg x 9cm, extended laser channel
H34102FT	6fg x 9cm, flush finish

NERVE ROOT SUCTION

- Premium quality suction with strong Stainless-Steel lumen
- Surgical grade ABS moulded handle, non-blocking design
- Precise suction control port
- Handle ergonomically shaped for firm grip and control
- Curved lip at the tip allows simultaneous retraction and aspiration
- The tube is flattened for easy access to the surgical site
- Made in UK.
- Single use, latex free, sterile easipeel packed
- UOM: 25/Dispenser Box

Order Code	Product
H33706121NR	12fg x 12cm, 60 deg
H33706122RT	12fg x 12cm, 60 deg, reverse tip

Surgical Suction Cannula

Eliminate risk with single use Suctions but with no compromise in quality, control and performance of Suction.

NASAL ASPIRATING DISSECTOR

- Premium quality suction with strong Stainless-Steel lumen
- Surgical grade ABS moulded handle, non-blocking design
- Precise suction control port
- Handle ergonomically shaped for firm grip and control
- Flattened and curved tip allows for ideal access and elevation in the nasal cavity
- Small fenestration on both sides of the tip allows for simultaneous suction
- Made in UK.
- Single use, latex free, sterile easipeel packed
- UOM: 25/Dispenser Box

Order Code

H215157NA

DANDY DRAINAGE CANNULA

- Premium quality Stainless Steel cannula
- Flexible silicone tube connector
- Etched at approximate 1cm markings, as a guide only
- This is not a calibrated instrument
- Single use, latex free, sterile easipeel packed
- UOM: 25/Dispenser Box

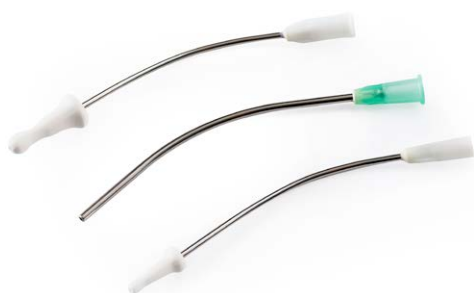

Order Code

H401236CD

Surgical Suction Cannula

Eliminate risk with single use Suctions but with no compromise in quality, control and performance of Suction.

TIBBS CANNULA SET

- Premium curved Stainless Steel cannula with atraumatic tips
- For use in vascular surgery, for irrigation of blood vessels
- Unique olive and cone hybrid design, fits a wide range of different sized veins
- Standard luer connection with non-blocking design
- Made in UK
- Single use, sterile packed, latex free
- UOM: 25/Dispenser Box

Order Code

H60113TB

ASPIRATION NEEDLE

- Sharp bevelled tip for safe and controlled penetration when aspirating fluids from cysts and organs
- Luer lock fitting
- Premium quality Stainless Steel cannula
- Made in UK
- Single use, latex free, sterile easipeel packed
- UOM: 25/Dispenser Box

Hand Surgery

HAND SURGERY

Hand Immobilisers	62-64
Finger Traps	65

Introducing FlexiHand

Silicone-encased Lead Hands

Soft touch silicone surface
for gentle patient contact ■

Lead core provides
weight and malleability
of the traditional
Lead Hand

Child and
Adult sizes
available . . . ■

Heaviest Hand
at 1435g - no
extra weighting
or Ballast is
required ■

Very flexible for accurate
and firm positioning and
returning the Hand to
the flat position can be
done with ease ■

Reusable

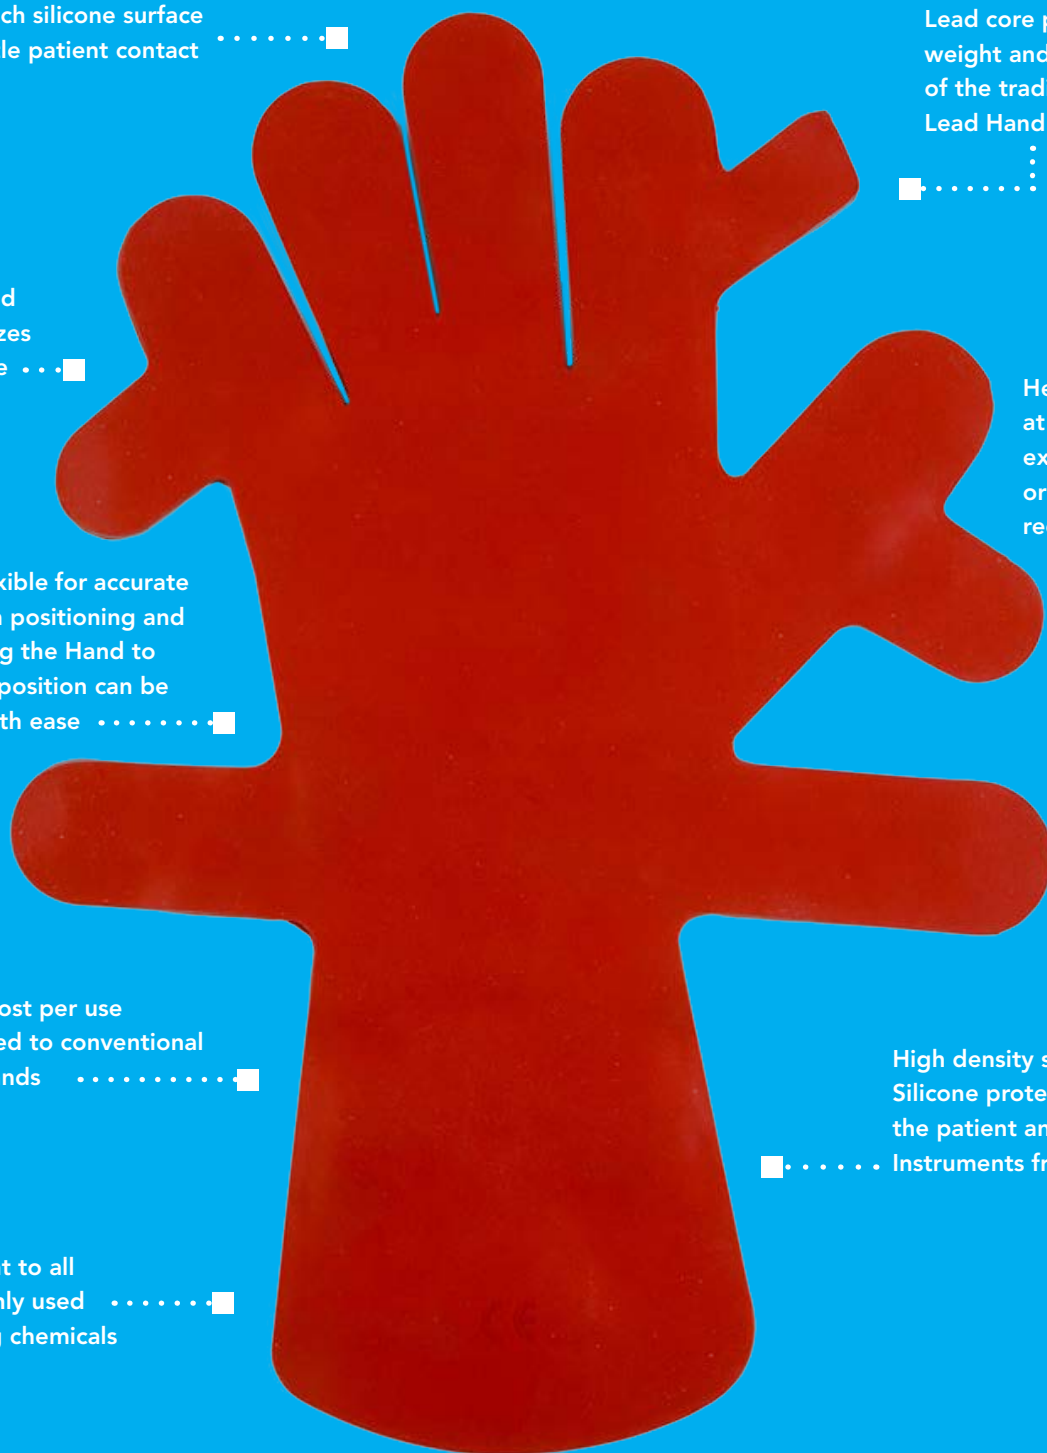

Lower cost per use
compared to conventional
Lead Hands ■

High density surgical
Silicone protects yourself,
the patient and other
Instruments from Lead

Resistant to all
commonly used ■
cleaning chemicals

SAFER. SMARTER. STRONGER.

HallmarkSurgical™
When you care.

Hand Immobilisers

New Zealand's most comprehensive lead-free hand immobiliser range

SILICONE FLEXI-HAND T™

- 2.2mm Lead core providing weight and malleability of traditional lead hands
- 8mm seamless surgical silicone encasing for extended life-time use and protection from lead
- Up to 30% heavier than traditional lead hands
- Resistant to all commonly used cleaning chemicals for surgical instruments
- Autoclaveable, maximum of 136°C
- Latex free, lead free, reusable

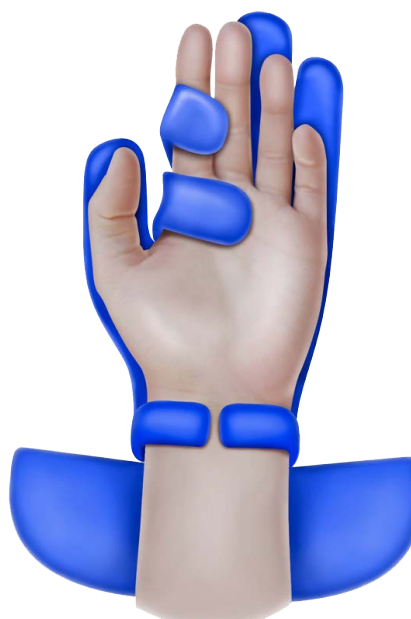

Order Code	Product
N802SL	Adult, 37 x 27cm, 1435g
N803BK	Child, 32 x 23cm, 945g

SILICONE FLEXI-HAND X™

- Malleable Aluminium core encased in Surgical Silicone
- Anti-Rollover wings to prevent, arm and hand rotation during surgery
- Radiolucent for use with fluoroscopy and X-Ray
- Latex free, lead free, reusable
- Autoclavable 134°C

Order Code	Product
N805XR	41cm x 33cm, 640g

Hand Immobilisers

Bridea Smoke-X™ Disposable Diathermy Speculum

Special diathermy plastic providing safe insulation, with no chance of failure

Slim line smoke channel facilitates precise horizontal manipulation of instruments.

Pearl White colour for lighting reflection and accurate colour rendition

Smooth single-handed operation and locking

Disposable smoke-extracting speculum, your complete solution to costly reusable insulated speculum failures

Disposable Speculum

Wide range of innovative speculum for every procedure

SIMS SPECULUM

- Surgical quality speculum
- 80mm and 90mm speculum lengths
- Strong, crystal clear medical polymer construction
- Single use, latex free, sterile easipeel packed
- UOM Each or 15/dispenser-box

Order Code

W132MS

BRIDEA SMOKE-X™ DIATHERMY SPECULUM - SINGLE USE

- Surgical quality, special diathermic plastic
- Effective smoke extraction
- Pearl white colour for lighting efficacy
- Facilitates precise horizontal manipulation of instruments due to the slim line smoke channel
- 360 access around the Cervix due to inward folded edges at the tip of the blades positioning and lifting the Cervix
- Single use, latex free, sterile easipeel packed
- UOM: Each, 20/Dispenser Box; 40/Outer

Single Use Gynaecology Instruments

Innovative disposable devices perfect for your clinic

ENDOSAMPLER™

- Disposable curettes for sampling the endometrium. The Endosampler II™, has two holes for even easier suction. The unique design of the Endosampler allows for superior accuracy and a more reliable sample than traditional endometrial sample devices.
- Convenient for routine use, suitable for cytologic and histologic diagnosis
- Facilitates both endometrial scraping and aspiration
- Avoids endometrial sample contamination
- Semi-rigid 3mm curette minimizes possibility of perforation
- Curette conveniently bent with sharp slot on side assures better sampling from all areas of the endometrial cavity
- Backflow of collected sample is prevented by lock-spring mechanism on syringe
- Sterile easipeel packed, single use, latex free
- UOM Each or 25/dispenser-box

60 x 40cm

Disposable Spackmann Cannula

Evenly placed perforations
in the tip for equal and
accurate dye distribution

Save reprocessing time and
cost while eliminating all cross
contamination and infection risk

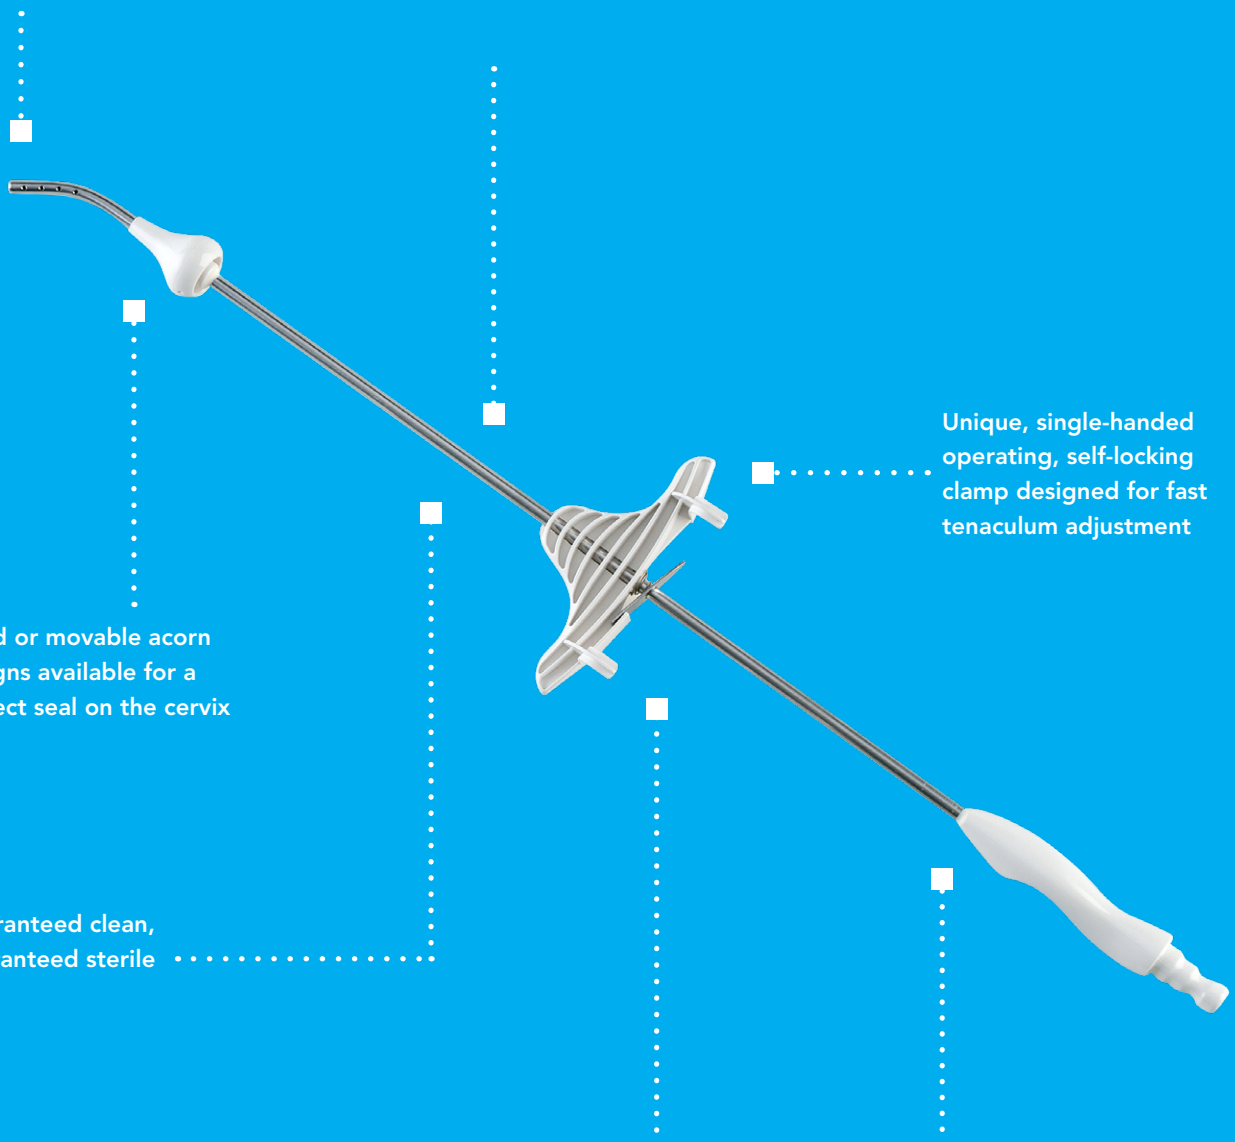

Unique, single-handed
operating, self-locking
clamp designed for fast
tenaculum adjustment

Fixed or movable acorn
designs available for a
perfect seal on the cervix

Guaranteed clean,
guaranteed sterile

Made in the UK from
premium materials

Strong, rigid stainless
steel shaft for effective
manipulation as required

Uterine Manipulators

Exceptional design and quality for improved manipulation and visualisation

SUREHOLD™ SPACKMANN UTERINE MANIPULATOR

- Risk of cross contamination eliminated with single use device
- For hydrotubation dye tests and uterine manipulation during laparoscopic procedures
- Unique self-locking clamp enables single handed use
- Option of fixed or movable acorn for perfect seal on cervix
- Evenly placed holes at the tip for equal dye distribution
- Non-blocking design
- 240mm length
- Single use, latex free, sterile easipeel packed
- UOM Each or 12/dispenser-box

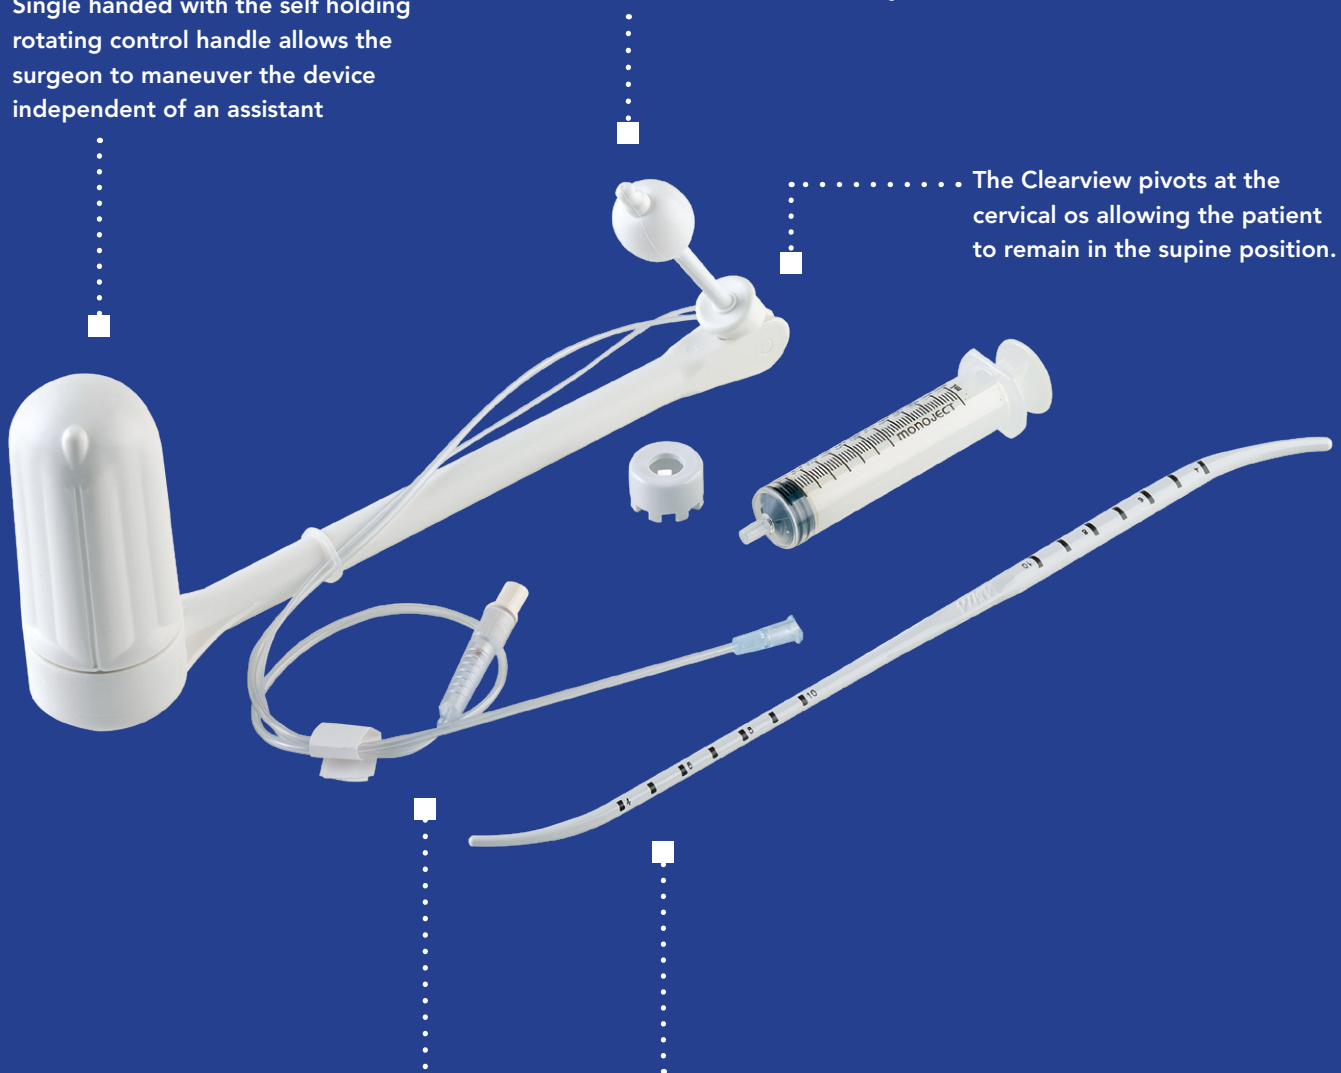

Order Code	Product
W2121NS	Fixed Acorn
W2122MA	Moveable Acorn

The Clearview Uterine Manipulator

Single handed with the self holding rotating control handle allows the surgeon to maneuver the device independent of an assistant

Greatest range of motion of all uterine manipulators - 90° Retroversion and 120° Anteversion - and lateral movement for clear visibility

The Clearview pivots at the cervical os allowing the patient to remain in the supine position.

Single use - completely disposable

One kit contains everything you require including a sound-dilator, 12ml syringe for the tip balloon and a dye injection port

Uterine Manipulators

Exceptional design and quality for improved manipulation and visualisation

CLEARVIEW UTERINE MANIPULATOR

- The ClearView Manipulator gives the greatest range of movement of any manipulator. The rotating control handle facilitates one-handed control, enabling the surgeon to manipulate the uterus without breaking the sterile barrier.
- Available in 4 tip lengths
- Kit is complete – no additional components required
- Dye injector – luer fitting & balloon inflation valve for effective chromotubation
- Single use, latex free, sterile easipeel packed
- UOM Each or 5/dispenser-box

Order Code	Product
WUM201	6/7cm Tip
WUM202	8/9cm Tip

CLEARVIEW TOTAL UTERINE MANIPULATOR – FOR THE TLH PROCEDURE

- This model has the same great features as the ClearView above with the addition of a pre-attached occluder balloon and three sizes of colpotomy cups. The colpotomy cups are designed for improved visibility during insertion and are coloured for easy identification when making the colpotomy incision. The occluder balloon serves as a seal, preventing the loss of the pneumoperitoneum once the colpotomy incision is made.
- Includes 3 x colpotomy cups & occluder balloon for TLH, depth spacer turret, uterine sound, 60ml syringe and 1 x 10ml syringe
- Available in 4 tip lengths
- Single use, latex free, sterile easipeel packed
- UOM Each or 5/dispenser-box

Order Code	Product
W9207CC	6/7cm tip
W9209SD	8/9cm tip

About Us

Hallmark Surgical has deliberately set the bar high. The name stands for excellence and commitment to, arguably, the most responsible, and most respected profession known to man. To fall short, when a life, (or lives), are at stake – on your part, or ours – would be unthinkable. But, more than that, Hallmark Surgical backs the skill and experience of people at all levels of health care. All life is both precious and perilous. And the instruments, devices and clothing we provide are devoted to preserving that life.

Because every day, like you, we both protect and serve.

HallmarkSurgical™
When you care.

Proving
indispensable
to those
who care.
